Storm stalking with a hurricane historian, 34, 200
Using early weather records, 34, 197
The weather and circulation of 1980, 34, 4
The weather of independence–9: 1781, the surrender of Yorktown, 34, 208

Radar
Radar: A short history, 34, 158

Radio
For the amateur–Radio: A useful tool for the observer, 34, 81

Rainfall
Precipitation–The forms and effects of ice and water, 34, 244
Rainfall–Can it be predicted over the long term?, 34, 66
Rains, floods, and cold: International weather in 1980, 34, 13
Weather queries, 34, 172

Simple Experiments in Atmospheric Physics (chronological order)
Once in a blue moon, 34, 129
Cellophane tape, hailstones, frost, and airplane windows, 34, 178
Cloud physics in a glass of beer, 34, 221
Temperature inversions have cold bottoms, 34, 273

Snow
Startling snow facts, 34, 264
The snow season–1979-80, 34, 16

Teaching Meteorology
Audio-visuals about the weather–Free films from NOAA, 34, 268
Audio-visuals about the weather, 34, 84
Simple Experiments in atmospheric physics–Once in a blue moon, 34, 129

Covers (chronological order)

February 1981: Extreme heat and drought, Texas Farm Lake by US Department of Agriculture

April 1981: Francis W. Reichelderfer–His early career

June 1981: Late afternoon thunderstorm over the Florida Everglades by Henry Lansford

August 1981: Collage of the later career of Francis W. Reichelderfer

October 1981: Coronagraph of the sun from the Solar Maximum Mission

December 1981: "Ghost trees" at Yellowstone National Park by Vincent J. Schaefer

Simple experiments in atmospheric physics–Cellophane tape, hailstones, frost, and airplane windows, 34, 178
Simple experiments in atmospheric physics–cloud physics in a glass of beer, 34, 221
Simple experiments in atmospheric physics–Temperature inversions have cold bottoms, 34, 273

Temperature
Biggest storm? Coldest winter? Heaviest snow?–It's all a matter of perspective, 34, 263
Cold related fatalities increasing annually, 34, 260
Deadly and costly: 1980 heat wave, 34, 125
What are heating degree days?, 34, 261

Tornadoes
Ten famous tornado outbreaks, 34, 100
Tornado!, 34, 26
TORNADO!–A picture story of the Malden, Missouri tornado of April 22, 1981, 34, 216

Weather queries (chronological order)
Dust devils, cold fronts, 34, 72
Acid rain, 34, 126
Humiture, contrails, thunderstorms, 34, 172
Wind chill, 34, 266

Weather Records
Biggest storm? Coldest winter? Heaviest snow?–It's all a matter of perspective, 34, 263
Deadly and costly: 1980 heat wave, 34, 125
Startling snow facts, 34, 264

Weatherwatch (chronological order)
November and December, 1980, 34, 36
January and February, 1981, 34, 85
March and April, 1981, 34, 131
May and June, 1981, 34, 181
July and August, 1981, 34, 228
September and October, 1981, 34, 277

Wind Chill
Weather queries, 34, 266

Guidelines for Contributors

WEATHERWISE publishes material of interest to everyone who has an interest in the weather including the educated layman, teachers of natural sciences and all serious students of the weather.

1. **All manuscripts must be typed on one side of 8½ x 11 inch paper, double spaced with ample margins.**
2. **All manuscripts must be submitted in duplicate.**
3. **References should be arranged alphabetically without numbering (double-spaced) on pages following the last page of text. The text citation should consist of the name of the author and the year of publication—(Brown, 1978).**
4. **In the list of references, each reference must be complete and in the following form. For an article: author(s), year, title of article, title of journal (abbreviated and underlined), volume number, pages. For a book: author(s), year, title of book (underlined), publisher, total pages or specific pages referred to.**
5. **All figures and illustrations must have an adequate legend typed on pages following the last page of text.**
6. **Line drawings and diagrams must be originals in black ink on white paper.**
7. **Photographs must be black and white glossy unless a specific request for a color slide comes from the publisher. Authors are invited to suggest possible cover illustrations for a particular article.**
8. **The Style-Manual of the American Institute of Physics offers excellent guidance on illustrations and other technical aspects of manuscript preparation. A Manual of Style, 12 ed., University of Chicago Press, Chicago, 1960, may also provide help in the preparation of articles.**
9. **All manuscripts will be critically read by a consulting editor and an executive editor. Accepted manuscripts are normally published within four months of acceptance. Each author receives four complimentary copies of the issue in which his article appears. Reprints of articles must be ordered at the time of acceptance.**
